INFORMATION MANAGEMENT

A SECURE SERVICE FOR SAFER BUSINESS

Stay in control of each and every Toughbook device within your organisation with our bespoke information management services.

Choose from:

- Attribution and recording of IMEI numbers or MAC addresses for your wireless modules
- SIM installation
- Asset tagging – including either standard and bespoke label sets
- A combination of all of the above

INFORMATION MANAGEMENT

WHAT DOES THE SERVICE PROVIDE?

With our information management services, you can take greater control of your Toughbook hardware before it even arrives on your premises. By attributing and recording IMEI numbers, MAC addresses and SIM numbers, you have the best possible – and most secure – view of what is being deployed and used throughout your organisations.

All services are carried out in our Toughbook factory, before being supplied to you on your premises.

WHAT ARE THE BENEFITS?

- **Greater security** – by giving you IMEI numbers, MAC addresses and SIM numbers, along with tagged and badged assets, the likelihood of theft or misuse is vastly reduced.
- **Greater productivity** – your Toughbooks arrive ready for work, so time and effort at the deployment stage are minimised.
- **Greater likelihood of unit recovery** – tagged Toughbooks are far easier to identify and therefore recover in the event of loss.
- **Greater cross-organisational consistency** – standardizing the tagging and identification of devices within your business gives you greater operational consistency across your organisation. This in turn reduces the workload for your IT specialists.

Product code	Service	Details
PCPE-PSMACAD	IMEI No./MAC Address	Wireless module ID
PCPE-PSSIMIN	SIM #	SIM installed in device
PCPE-PSATAG1	Asset tagging (STD)	Using standard CPE label set
PCPE-PSATAG2	Asset tagging (Specific)	New label set
